# Sociology 616: Gender, Race and Environment

Welcome to Sociology 616: Gender, Race and Environment. How are relationships with the natural world implicated in constructions of race and gender? To what extent is environmental degradation held in place through systems of gender and racial hierarchies? How do race and gender shape theory within environmental sociology? Can we envision an "intersectionality" that includes the environment? How do race and gender shape experiences of environmental degradation and movements for social and environmental change? These are some of the questions that will guide our readings and conversations throughout the term.

Our course examines classic themes within environmental sociology to see how adding gender and race changes our understanding of this material, and engages new topics that have emerged through scholarship on the intersection of gender, race and environment. We will read a combination of classic works and newer theory. Most readings are by sociologists, but we will also read from historians, geographers, philosophers and more.

## Assignments:

In Class Participation	15%
Discussion Leading	20%
Reading Journal	15%
Weekly Reflection Memo and Synopsis	20%
Final Paper	30%

## In Class Participation

Your engaged presence matters for our collective learning. Come to class with enough of the reading done well enough to participate effectively with your peers in small and full group discussion. Listen attentively. Speak thoughtfully. Bring us your good energy and ideas. Plan to be early or at least on time to class and remain with us until the end. Any absences from class need my prior approval.

## **Discussion Leading**

Each week two students will work as a team to lead approximately 60-80 min of the class. Discussion leaders will meet in advance and work together to provide a summary of the main ideas of the text, list and define key terms, and most importantly, come with a plan to facilitate the class including a series of "discuss-able" questions (you may also count on questions from the cross cutting themes report back, see below). You are also encouraged to bring in background materials such as music, photos, artwork, youtube videos, etc. Your team will earn an "A" if it meets all the criteria below:

- 1) Briefly but thoroughly summarizes the **key concepts** and arguments of the assigned readings for the day (ppt is great but your summary MUST be short, e.g. 8-10 min).
- 2) Draws **connections** between the current readings, course themes and other readings/aspects of the course.
- 3) Effectively **facilitates the participation** of everyone in class.
- 4) Shows **creativity** and is **well prepared**.

Teams will submit an outline of the game plan to me including any materials (ppt slides, handouts) by noon the day prior to the discussion. Each of you will lead one class.

## Reading Journal

This is an informal space for you to develop your own ideas in relation to the material. The primary focus is a place for you to make the material your own through further engagement with the readings as you see fit. There is no specific format required, the minimum expectation is roughly one page per week however more engaged use of this medium is advised. Reading journals will be collected in Week 5, due at the end of the term, and returned to students after the course.

## Reflection Memo and Synopsis of Cross Cutting Themes

It is my goal that we will think about a number of important themes each week from culture and the body to race and gender. However not all those themes will be obvious in the reading. In order to create a more "intersectional" conversation in class you will each take responsibility for one theme. In order to do this, each week students will turn in a one page reflection memo and present a 2-5 min synopsis to the class of how the course reading relates to one of the "cross cutting themes." Working in twos or threes is encouraged. Meet with your team a few days prior to class to share ideas, questions and write up the memo.

## *Proposed Cross cutting Themes:*

Gender Race Capitalism Culture
Resistance The Body Labor/work Ideology/epistemology The state

E.g. for Gender: Your memo and synopsis for the class might address: What are key concepts from the reading relating to gender and environment? How does this week's reading add to existing theory on the relationship of gender and environment? What is missing but could be added? What critiques do you have? Provide one or two discussable questions from this week's reading related to gender.

## Final Paper

The final paper is a more formal opportunity for you to expand upon an area of your own interest in more detail. You can use the final paper to address one of the questions listed in the syllabus, to develop an emerging research, thesis or dissertation topic related to course

material, or further explore any topic of your choosing related to the course theme. Papers should be 8-12 pp. or 1600-3200 words. You will need to choose a topic by Week 3 and submit a tentative outline by Week 7. You will bring a complete draft to class during Week 9 for our in class peer review session. The final paper is due on final exam day of finals week. PLEASE NOTE IN ADVANCE: With our class size it will not be possible for me to accommodate late papers.
